**Alternative Educational Futures** - 2008-01-01

“We desperately need the dynamic revolution in education that this book offers us, reflecting the new ways of thinking and being on this planet that will permit us to live in peace as a global family even through massive climate changes. Read it and put these ideas into practice as quickly as possible in any ways you can!”

—Elisabet Sahtouris, Evolutionary biologist and futurist, author of EarthDance: Living Systems in Evolution

**Hinduism and Ecology** - Ranchar Prime 1996

Hinduism and Ecology looks at the environmental values of the Hindu tradition—its past and present teachings and practices. In it the author speaks to prominent Hindu environment activists and thinkers, presents their ideas and explains what they are doing. The book is complementary to Buddhism and Ecology also published by Motilal Banarsidass Publishers Private Limited.

**Integral Ecology** - Sean Esbjorn-Hargens, Ph.D. 2011-03-08

Today there is a bewildering diversity of views on ecology and the natural environment. With more than two hundred distinct and valuable perspectives on the natural world—and with scientists, economists, ethicists, activists, philosophers, and others often taking completely different stances on the issues—how can we come to agreement to solve our toughest environmental problems? In response to this pressing need, Integral Ecology unites valuable insights from multiple perspectives into a comprehensive theoretical framework—one that can be put to use right now. The framework is based on Integral Theory, as well as Ken Wilber’s AQAL model, and is the result of over a decade of research exploring the myriad perspectives on ecology available to us today and their respective methodologies. Dozens of real-life applications and examples of this framework currently in use are examined, including three in-depth case studies: work with marine fisheries in Hawai’i, strategies of eco-activists to protect Canada’s Great Bear Rainforest, and a study of community development in El Salvador. In addition, eighteen personal practices of transformation are provided for you to increase your own integral ecological awareness. Integral Ecology provides the most sophisticated application and extension of Integral Theory available today, and as such it serves as a template for any truly integral effort.

**The Oxford Handbook of Comparative Political Theory** - Leigh K. Jenco 2019

“The Oxford Handbook of Comparative Political Theory provides an entry point into this burgeoning field by both synthesizing and challenging the terms that motivate it. The handbook demonstrates how mainstream political theory can and must be enriched through attention to genuinely global, rather than parochially Euro-American, contributions to political thinking. Entries emphasize exploration of substantive questions about political life-
ranging from domination to political economy to the politics of knowledge—in a range of global contexts, with attention to whether and how those questions may be shared, contested, or reformulated across differences of time, space, and experience. They connect comparative political theory to cognate disciplines including postcolonial theory, area studies, and comparative politics. Creative organizational tools such as tags and keywords aid in navigation of the handbook to help readers trace disruptions, thematic connections, contrasts, and geographic affinities across entries”--

Spirituality Unveiled - Stephen Wollaston
2010-04-01 Spirituality Unveiled puts forward a succinct and compelling synthesis of numerous spiritual traditions. While weaving together insights from contemporary and past masters of spirituality along with holistic and Earth centred wisdom it beautifully highlights teachings about the essentials of creative unfoldment. Spirituality Unveiled invites readers to join in the important search to find a healthy interaction with life. Key areas include the power of creativity the effects of positive and negative actions and harmonious living with the natural world.

Humans on Earth - Filipe Duarte Santos
2011-09-06 This is a wide-ranging and persuasive book written by an undisputed expert. Beginning with a broad history of the Universe, Earth, Life, and Man, it considers the origins and rise of science and technology, before moving on to discuss the present state of the world and its/our possible futures. Humans on Earth then addresses the main challenges for social and economic development in the 21st century in the context of global change. It presents a detailed but non-technical analysis of questions relating to climate change, our dependence on fossil fuels, deforestation, loss of biodiversity, desertification, and air, water, soil, and ocean pollution, as well as problems related to overpopulation, poverty, social and economic inequalities, and conflict potential. The three main, but largely mutually exclusive, discourses on human development and the environment are described and discussed. The main emphasis is on the risks and uncertainties of the short-term future – the next 50 to 100 years – with regard to environmental degradation and the sustainability of our growth paradigm. "... a sweeping, thoughtful view of the role of humans in shaping our modern world." Paul Epstein, Center for Health and the Global Environment, Harvard Medical School

Integral Economics - Ronnie Lessem 2016-05-23
Why on earth is economics perceived to come in only one or at best two different a-cultural if not a-moral guises? There are real, and many, alternatives to the economic mainstream. The trouble is, of course, that they are hidden from us. In Integral Economics Ronnie Lessem and Alexander Schieffer pave the way for a sustainable approach to economics, building on the richness of diverse economic approaches from all over the globe. By introducing the most evolved economic perspectives and bringing them into creative dialogue they argue that neither individual enterprises nor wider society will be transformed for the better without a new economic perspective. Here, they introduce a comprehensive framework based on the same ‘Four Worlds’ model that is applied to enterprise and research in their earlier works. Given the richness of even mainstream economic theory reviewed in this book, let alone the variety of alternative approaches introduced, it is frustrating that policymakers and business practitioners are impoverished by a lack of apparent economic choice - between a seemingly failing capitalism and an already failed communism. The ‘villains of the piece’ in relation to this lack of choice are not so much the financial community and governments, though they do have much to answer, but the schools of economics and the business schools, that have created the very social ethos, the philosophical principles, and the mathematical models, that influence events. Integral Economics is partly addressed to academics and students in those very schools, who have either realized the error of their ways, or, less dramatically, are curious to explore whether our businesses and communities could be run in a different way. It will be welcomed by informed senior practitioners, eager to understand the current rethink of economic theory and practice and to discover how to position themselves, their organizations, and their society within a new framework.

Integral Dynamics - Ronnie Lessem 2016-05-23
The theory of integral dynamics is based on the view that the development of individual leaders or entrepreneurs requires the simultaneous development of institutions and societies. It
seeks a specific way forward for each society, fundamentally different from, but drawing on, its past. Nearly every natural science has been transformed from an analytically-based approach to a dynamic one: now it is time for society and culture to follow suit locally and globally. Each culture, discipline and person is incomplete and is in need of others in order to develop and evolve. This book sets out a curriculum for a new integral, trans-cultural and trans-disciplinary area of study, inclusive of, but extending beyond, economics and enterprise. It embraces a trans-personal perspective, linking self with community, enterprise and society, and focusing on the vital relationship between local identity and global integrity. For the government policy maker, the enlightened business practitioner, and the student and researcher into economics and enterprise, the new discipline is set out here in complete detail by a multi-national team of Gower’s Transformation and Innovation Series authors. Illuminated with examples relating the conceptual to the practical, this is a text, not for a pre-modern, modern, or even post-modern era, but for what has been called our trans-modern age.

**Handbook of Hinduism in Europe (2 vols)**
2020-07-27 The Handbook of Hinduism in Europe portrays and analyses Hindu traditions in every country in Europe. It presents the main Hindu communities, religious groups, forms and teachings present in the continent and shows that Hinduism have become a major religion in Europe.

**Nanotechnology and Global Equality**
Donald Maclurcan 2012-03-27 The book places nanotechnology’s emergence within a broad historical and contemporary global context while developing and testing an interpretive framework through which to assess nanotechnology’s claims. It clarifies the nature of global engagement with nanotechnology research and development, revealing surprising scenarios, unacknowledged by most mainstream commentators. The book concludes by exploring a range of perspectives from Thailand and Australia about nanotechnology’s foreseen implications for global inequity.

**Kamandalu**
Shrikala Warrier 2014-12 Hindu theology views rivers as goddesses who confer blessings and spiritual purification and their release from the grip of the demon of drought is a recurring theme in the mythology. India is a country blessed with many rivers, but of these, seven are considered to be particularly important. Known collectively as Saptaganga, Sapta Sindhu or Saptapunyanadi, the Ganges, Yamuna, Sindhu, Sarasvati, Godavari, Narmada and Kaveri rivers are invoked at the start of every ritual. They weave through sacred narratives about gods, sages and heroes and define the physical, spiritual and cultural landscape of Bharatavarsha.

**A Guide to Systems Research**
Mary C. Edson 2016-12-15 This guide is designed for systems researchers – emerging and seasoned – searching for holistic approaches of inquiry into complexity, which the Systems Sciences provide. The authors share insight into the foundations of research that are not only systematic in terms of rigor, but systemic in perspective, analysis, design, development, implementation, reporting, and evaluation. This guide also explores researcher competencies necessary to conduct sound systems research. Researchers using this guide will gain understanding of what distinguishes systems research from other types of research and why it is important in research today.

**Caste and nature**
Mukul Sharma 2017-09-25 Rarely do Indian environmental discourses examine nature through the lens of caste. Whereas nature is considered as universal and inherent, caste is understood as a constructed historical and social entity. Mukul Sharma shows how caste and nature are intimately connected. He compares Dalit meanings of environment to ideas and practices of neo-Brahmanism and certain mainstreams of environmental thought. Showing how Dalit experiences of environment are ridden with metaphors of pollution, impurity, and dirt, the author is able to bring forth new dimensions on both environment and Dalits, without valourizing the latter’s standpoint. Rather than looking for a coherent understanding of their ecology, the book explores the diverse and rich intellectual resources of Dalits, such as movements, songs, myths, memories, and metaphors around nature. These reveal their quest to define themselves in caste-ridden nature and building a form of environmentalism free from the burdens of caste.
The Dalits also pose a critical challenge to Indian environmentalism, which has, until now, marginalized such linkages between caste and nature.

**Light, Truth, and Nature**-Thomas Pliske 2017-07-13 Universal Nature, the source from which we all have evolved, is more than her outer appearances and movements. There is in her an inner presence and purpose in whose fulfillment rests our own satisfaction, happiness and perfection as individuals and as a species. The book explores the dimensions and connections of the spiritual and physical workings of Nature from many perspectives: scientific, cultural, philosophical, medical and aesthetic. I give special emphasis to the indispensable role that indigenous cultures and the Vedic spiritual tradition play in deepening and transforming our vision and knowledge of the Earth and of ourselves. As a Nature lover, scientist and educator, the author especially encourages those engaged in scientific, medical and technological disciplines to embrace a wider epistemology, vision and ethics with the goals of discovering the Truth underlying all levels of human experience and sharing that Truth openly and sincerely as educators and grateful servants of the human family. The author's understandings necessarily spring from personal experiences, but he invites the reader to "write your own story" that unifies your journey with the universal odyssey on which we all are embarked. Everything in the universe has the divine spark of spiritual light as its essence. Evolution has given us the wisdom of our origin; ecology has given us the wisdom of our integral unity; and spirituality will give us the experience of clear guidance and wisdom to joyously transform ourselves and the world. The last chapters suggest steps to attain that experience.

**Sun, Moon & Earth**-Mas Vidal 2016-11-21 Sun, Moon, and Earth tells the story of the "twin sciences" of Yoga and Ayurveda. Weaving in the authors long professional and personal experience as a yoga teacher and Ayurveda practitioner, it explores how these traditions can be integrated into our lives as a practical means for balanced living and spiritual evolution. It is written for the growing audience of hatha yogis interested both in asana or postural yoga and a more conscious, Ayurvedic lifestyle.

**Religion and the Environment**-Roger S. Gottlieb 2010 In the last two decades a new form of religiously motivated social action and a virtually new field of academic study each based in recognition of the connections between religion and humanity’s treatment of the environment have developed. Interactions between religion and environmental concern have been manifest in the explosive growth of ecotheological writings, institutional commitment by organized religions, and environmental activism explicitly oriented to religious ideals. Clergy throughout the world in virtually every denomination have received word from leaders of their religion that the environment no less than sexuality, poverty, or war and peace is now a basic and compelling religious matter. Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition, profound criticisms of the past, and ecologically oriented visions of God, the Sacred, the Earth, and human beings. Theologians from every religious tradition along with dozens of non-denominational spiritual writers have confronted world religions past attitudes towards nature. In the realm of institutional commitment, public statements and actions by organized religions have grown dramatically. In the context of political action, throughout the U.S. and the world religiously oriented groups take part in environmentally oriented political action: from lobbying and consciousness raising to activist demonstrations and civil disobedience. This collection serves as a comprehensive introduction, overview, and in-depth account of these exciting new developments. The four volumes cover virtually every aspect of the field from theological change and institutional commitment to innovation in liturgy, from new ecumenical connections among different religions and between religion, science and environmental movements, from religious participation in environmental politics to an account of the global social and political contexts in which religious environmentalism has unfolded.

**Encyclopaedia of Great Festivals**-K. L. Chanchreek 2007

**The Routledge Handbook of Hindu-Christian Relations**-Chad M. Bauman 2020-12-30 The historical interplay of Hinduism as an ancient
Indian religion and Christianity as a religion associated (in India, at least) with foreign power and colonialism, continues to animate Hindu-Christian relations today. On the one hand, The Routledge Handbook of Hindu-Christian Relations describes a rich history of amicable, productive, even sometimes syncretic Hindu-Christian encounters. On the other, this handbook equally attends to historical and contemporary moments of tension, conflict, and violence between Hindus and Christians. Comprising thirty-nine chapters by a team of international contributors, this handbook is divided into seven parts: Theoretical and methodological considerations Historical interactions Contemporary exchanges Sites of bodily and material interactions Significant figures Comparative theologies Responses The handbook explores: how the study of Hindu-Christian relations has been and ought to be done, the history of Hindu-Christian relations through key interactions, ethnographic reflections on current dynamics of Hindu-Christian exchange, important key thinkers, and topics in comparative theology, ultimately providing a framework for further debates in the area. The Routledge Handbook of Hindu-Christian Relations is essential reading for students and researchers in Hindu-Christian studies, Hindu traditions, Asian religions, and studies in Christianity. This handbook will also be very useful for those in related fields, such as anthropology, political science, theology, and history.

Modern Hinduism in Text and Context-
Lavanya Vemsani 2018-07-26 Modern Hinduism in Text and Context brings together textual and contextual approaches to provide a holistic understanding of modern Hinduism. It examines new sources - including regional Saiva texts, Odissi dance and biographies of Nationalists - and discusses topics such as yoga, dance, visual art and festivals in tandem with questions of spirituality and ritual. The book addresses themes and issues yet to receive in-depth attention in the study of Hinduism. It shows that Hinduism endures not only in texts, but also in the context of festivals and devotion, and that contemporary practice, devotional literature, creative traditions and ethics inform the intricacies of a religion in context. Lavanya Vemsani draws on social scientific methodologies as well as history, ethnography and textual analysis, demonstrating that they are all part of the toolkit for understanding the larger framework of religion in the context of emerging nationhood, transnational and transcultural interactions.

Religion and Sustainable Agriculture-Todd LeVasseur 2016-09-16 Distinct practices of eating are at the heart of many of the world’s faith traditions -- from the Christian Eucharist to Muslim customs of fasting during Ramadan to the vegetarianism and asceticism practiced by some followers of Hinduism and Buddhism. What we eat, how we eat, and whom we eat with can express our core values and religious devotion more clearly than verbal piety. In this wide-ranging collection, eminent scholars, theologians, activists, and lay farmers illuminate how religious beliefs influence and are influenced by the values and practices of sustainable agriculture. Together, they analyze a multitude of agricultural practices for their contributions to healthy, ethical living and environmental justice. Throughout, the contributors address current critical issues, including global trade agreements, indigenous rights to land and seed, and the effects of postcolonialism on farming and industry. Covering indigenous, Buddhist, Hindu, Christian, Muslim, and Jewish perspectives, this groundbreaking volume makes a significant contribution to the study of ethics and agriculture.

Plant Lives-Ellison Banks Findly 2008 This book examines, for the first time, those threads in Indian thought that present a prolife view of plants. Using texts from Vedic, Hindu, Jain, and Buddhist traditions, the author argues that there is strong support in early materials that plants are thought to be alive, to be sentient (and have the one sense of touch), to feel pleasure and pain, to have an interior consciousness, and to be bearers of karma. Moreover, while plants are traditionally thought to be of tamasic quality with their immobility and dullness, they are sometimes described as sattvic, with their calmness, even mindedness, and service to others. In fact, the author argues, plants are frequently used to provide a model for the practiced ascetic-in that they bend but don't break with the wind, aren't distracted when buzzed by a mosquito, and flourish in their steadfastness. Given the theoretical discussion of plants within the range of sentient being, the book then focus on the intimate life humans have
with plants. Texts devoted to botany, medicine, law, art, literature, and religion, for example, depict human conversation with trees, humans marrying trees, and humans delineating their responsibilities for the well-being of plants in the greatest detail. Most difficult is the problem of eating, and in that ahimsa or non-violence towards plants would be the ideal in the extreme, vegetarianism shows up the compromise that is made once plants are brought into the sentient realm. Finally, the author explores the founding premises of several current environmental leaders and movements in India that focus on plants - e.g., tree protection, tree planting, seed saving, biodiversity - to examine whether contemporary plant-oriented ecological activism in India reflects older, traditional ideas about plants. Asking whether new Hindu, Jain, or Buddhist movements reflect respective older ideas, the author finds that contemporary Indian practices remain, on the whole, authentic reflections of their older roots.

**Nature’s Matrix** - Ivette Perfecto 2019-05-31
When first published in 2009, Nature’s Matrix set out a radical new approach to the conservation of biodiversity. This new edition pushes the frontier of the biodiversity/agriculture debate further, making an even stronger case for the need to transform agriculture and support small- and medium-scale agroecology and food sovereignty. In the first edition, the authors set out a radical new approach to the conservation of biodiversity. This is based on the concept of a landscape as a matrix of diverse, small-scale agricultural ecosystems, providing opportunities to enhance conservation under the stewardship of local farmers. This contrasts with the alternative view of industrial-scale farms and large protected areas which exclude local people. However, since then the debate around conservation and agriculture has developed significantly and this is reflected in this updated second edition. The text is thoroughly revised, including: a reorganization of chapters with new and timely topics introduced, updates to the discussion of agroecology and food sovereignty, bringing it in line with the current debates, greater coverage of the role of agroecology, in particular agroforestry, as an important component of climate change adaptation and mitigation, highlighting recent studies on the role of intensive agriculture in climate change and loss of biodiversity, and more attention given to the discussion of land sparing versus land sharing.

By integrating the ecological aspects of agriculture and conservation biology, with a political and social analysis as well as historical perspective, the book continues to set a progressive agenda and appeals to a wide range of students and professionals.

**Mindfulness in Education** - Kenneth Tobin
2020-06-30 This book explores how mindfulness has been infused into education to produce favorable outcomes, such as stress reduction, heightened focus, resilience, calmness, alertness, mood regulation, self-awareness, professional commitment, and increased compassion and kindness to self and others. The chapters are situated in diverse contexts, including schools and colleges, warfare, violent extremism, global warming, child sex abuse, and species extinction. A feature of the book is the use of what is learned from ongoing research to design interventions to increase the incidence of mindful practices, to enhance learning and forms of conduct to transform social life and sustain harmonious lifestyles. Inclusion of mindfulness-based interventions in teacher education programs include breathing meditation and tools such as heuristics and mindful writing. Breathing meditation and its relationship to mindfulness is addressed, including abdominal breathing as a component of meditation, leading to mindful conduct and physiological changes, including heart rate and blood oxygenation levels. The extent to which breathing practice includes nasal and oral inhalation and exhalation is also considered in relation to increasing levels of nitric oxide in the airways, thereby enhancing social communication and wellness. This book was originally published as a special issue of Learning: Research and Practice.

**Political Theory on Death and Dying** - Erin A. Dolgoy 2021-09-06 Political Theory on Death and Dying provides a comprehensive, encyclopedic review that compiles and curates the latest scholarship, research, and debates on the political and social implications of death and dying. Adopting an easy-to-follow chronological and multi-disciplinary approach on 45 canonical figures and thinkers, leading scholars from a diverse range of fields, including political science, philosophy, and English, discuss each thinker’s ethical and philosophical accounts on mortality and death. Each chapter focuses on a single established figure in political philosophy,
as well as religious and literary thinkers, covering classical to contemporary thought on death. Through this approach, the chapters are designed to stand alone, allowing the reader to study every entry in isolation and with greater depth, as well as trace how thinkers are influenced by their predecessors. A key contribution to the field, Political Theory on Death and Dying provides an excellent overview for students and researchers who study philosophy of death, the history of political thought, and political philosophy.

**World Encyclopaedia of Interfaith Studies: Global interfaith movement** - 2009

**South and Southeast Asia Culture and Religion** - 2008

**Human Ecology in the Vedas** - Marta Vannucci 1999 This Book Analyses Vedic Writings To Highlight The Ancient Rsis Perceptions Of The Universe, Nature, And Cause-Effect Relationships. It Discusses Selected Rgvedic Hymns And Explores Important Aspects Of Indra And Varuna.

**Prince of Dharma** - Ranchor Prime 2002 With over sixty stunning plates of original art, Prince of Dharma is a bold and glorious rendering of the life of the Buddha by author Ranchor Prime, who brings to life the inspired work of award-winning artist B.G. Sharma with a sensitive, immensely readable, and rarely seen biography of the Buddha. From his birth as a prince to his final lesson in achieving nirvana, Sharma captures it all. Ornamented throughout with quotes from A Dhammapada for Contemplation by Ajahn Munindo, the combination of Prime's story and Sharma's art culminate in the most unique contribution to the canon of Buddhist literature and art that has emerged since the Buddha took birth thousands of years ago.

**Crater Lake National Park** - Ann Sutton 2002 Crater Lake is one of Earth's most precious jewels. Ann and Myron Sutton have captured the beauty and majesty of this awesome place, with breathtaking images and richly descriptive text.

**Forthcoming Books** - Rose Arny 2002

**The British National Bibliography** - Arthur James Wells 2004

**Embodied Wisdom** - Joy Colangelo 2003-11-01 Embodied wisdom tells us that we have a great capacity to change brain function through proper movement. But powerful culture pressures dictate the way we move and underlies some of our personal failures, our aches and pains, and our feelings of apathy when it comes to changing our lives"--Page 3 of cover.

**Applying Wisdom to Contemporary World Problems** - Robert J. Sternberg 2019-07-03 This book presents perspectives from world experts in the field of wisdom studies to propose how wisdom can provide the foundation upon which solutions to social and global problems can be grounded. The authors argue that where society has come to rely on leaders with skills relating to knowledge and intelligence; instead we should focus on wisdom-based acumen for our leaders in government, business, and the military. In this book the authors offer evidence-based definitions of wisdom and apply these to world problems they believe could potentially be solved using wise solutions. Among the case studies confronted are terrorism and war, poverty and economic disparity, climate change, increasing antibiotic resistance and political corruption. Focusing on the cognitive, social and emotional processes involved in everyday decision-making, this book presents a compelling argument for the application of wise problem-solving to complex world issues that will appeal in particular to those in leadership, teaching and policy roles, and open new pathways in the fields of wisdom-studies, psychology, sociology and political theory.

**The Complete Book of Ayurvedic Home**
Remedies-Vasant Lad, M.A.Sc. 2012-02-22
Based on the ancient healing tradition from India that dates back thousands of years, The Complete Book of Ayurvedic Home Remedies offers natural alternatives to conventional medicines and treatments with practical advice and easy-to-follow instructions. Dr. Vasant Lad, a leading authority in this field, has created an invaluable guide to treating common ailments and chronic problems with strategies tailored to your personal needs based on your dosha. Dr. Lad first explains the principles behind the science of Ayurveda, exploring the physical and psychological characteristics of each of the three doshas, or mind-body types—vata, pitta, and kapha. Once you have determined which type or combination of types you are, Dr. Lad helps you to begin your journey to the ultimate "state of balance" and well-being. Dr. Lad explains why certain imbalances often result in illness and shows you how to restore your body to natural order. You'll learn which traditional Ayurvedic remedies—herbal teas and formulas, essential oils, meditation, yoga—offer relief from a variety of conditions, such as cold and flu symptoms, headaches, toothaches, sore throats, high cholesterol, vision problems, anxiety, and depression. Dr. Lad also shows you how to use diet and specific Ayurvedic techniques to prevent future illness and to promote body consciousness and healthy living. The Complete Book of Ayurvedic Home Remedies enables us all to experience the benefits of Ayurveda's healing properties that have been refined over thousands of years. All of the herbs, foods, and oils Dr. Lad recommends can be found in local health food stores or through mail-order catalogs. Complete with an extensive glossary and resource list, this is the definitive guide to natural, safe, and effective remedies, everyday keys to a lifetime of vitality and well-being.

Jainism and Environmental Philosophy-Aidan Rankin 2018-02-12 Environmental policy agendas, activism and academic research into ecological questions are all predominantly derived from the philosophical perspectives of the West. At national and global levels, environmental policy-makers tend to work according to Western-based methodologies. At the same time, emergent or developing economies are profoundly affected by the issues they address, including air pollution, rapid urban expansion, habitat loss and climate change. If environmental awareness, and the policies that stem from it, are to have a lasting global impact, it is important that non-Western voices are heard in their own right, and not merely as adjuncts of Western-led agendas. Jain thought is a useful case study of a system of values in which environmental protection and the idea of a ‘web of life’ are central, but which has evolved in India independently of Western environmentalism. This book describes and explains Jain environmental philosophy, placing it in its cultural and historical context while comparing and contrasting with more familiar or ‘mainstream’ forms of ecological thought. It will also show how this thought translates into practice, with an emphasis on the role of environmental concerns within the business and commercial practices of Jain communities. Finally, the book examines the extent to which Jain ideas about environmental protection and interconnectedness have universal relevance. This book will be of great interest to students and scholars of environmental ethics, sustainable business and economics, environmental policy, and Jainism.

The Book of Secret Wisdom-Zinovya Dushkova 2015-10-12 In these troubled times, do you wonder about the future and the destiny of humanity? Do you want to know the true purpose of your existence on Earth and in the Universe? The most secret book in the world holds the answers you seek! Named as one of the 100 Most Spiritually Influential Living People by Watkins Mind Body Spirit, Zinovya Dushkova, Ph.D., is one of the few who has gained access to the million-year-old manuscript widely known as the Book of Dzyan, which contains answers to humanity's most pressing questions. Written in the language of the Gods, called Senzar, it is secretly hidden in the heart of the Himalayas, accessible to only a chosen few over the course of human history, accessible to only a chosen few over the course of human history, including Gautama Buddha, Jesus Christ, Pythagoras, Plato, and Helena Blavatsky. Now, for the first time ever, Dr. Dushkova has presented a never-before-seen excerpt from the mysterious Book of Dzyan in The Book of Secret Wisdom to bring new meaning and hope into your life. Beautiful and enlightening, it will reveal not only our past,
but also our present and future. To facilitate your understanding of this profound and poetic text, the book contains a comprehensive glossary gleaned from the supreme sources of wisdom. In The Book of Secret Wisdom, you will discover the answers to these questions: • What are the ultimate goal and purpose of human existence? • What is the cause of natural disasters, global warming, and epidemics? • What really happened in 1999 and 2012? • What Great Event occurred invisibly in 2017? • When Armageddon and the Last Judgment occur? • What should you expect in the coming decades? • Why are people dying, and is there a chance to be immortal? • Why does it seem that time is speeding up? • What is the famous Philosopher's Stone? • and much, much more! The all-embracing and undistorted Truth presented in this book was once accessible only to the privileged initiates of ancient civilizations who spent much of their lives seeking it. But now it is available to you in the pages of The Book of Secret Wisdom, a book that offers unprecedented access to the world's most ancient mysteries. If you are a spiritual seeker who enjoys expanding the boundaries of your understanding, this book is for you. "This book is an immeasurable treasure of knowledge. Its depth and scope are incredible." — 2016 Benjamin Franklin Awards Judge "It reads beautifully like a storybook, feels like a fable, and reveals valuable lessons of love for this lifetime." — Allyson Gracie, Wellness Specialist, Pilates & Yoga Instructor "One of the most inspiring, all encompassing, volumes of true truth I have read in all my years of seeking truth." — April Gieseking "It is deep, deeper and vast than you could have ever imagined." — Aakriti, Goodreads Don't wait! Buy The Book of Secret Wisdom now to unveil the future and destiny of humanity!

2nd National Convention of Environmental Engineers and National Seminar on Impact of Environmental Protection on Future Development of India- 1987

Indian Ethics: Classical traditions and contemporary challenges- Purusottama Bilimoria 2007 Indian ethics is one of the great traditions of moral thought in world philosophy whose insights have influenced thinkers in early Greece, Europe, Asia, and the New World. This is the first systematic study of the spectrum of moral reflections from India
